Architectural Analysis and Design Patterns

Human Resource System

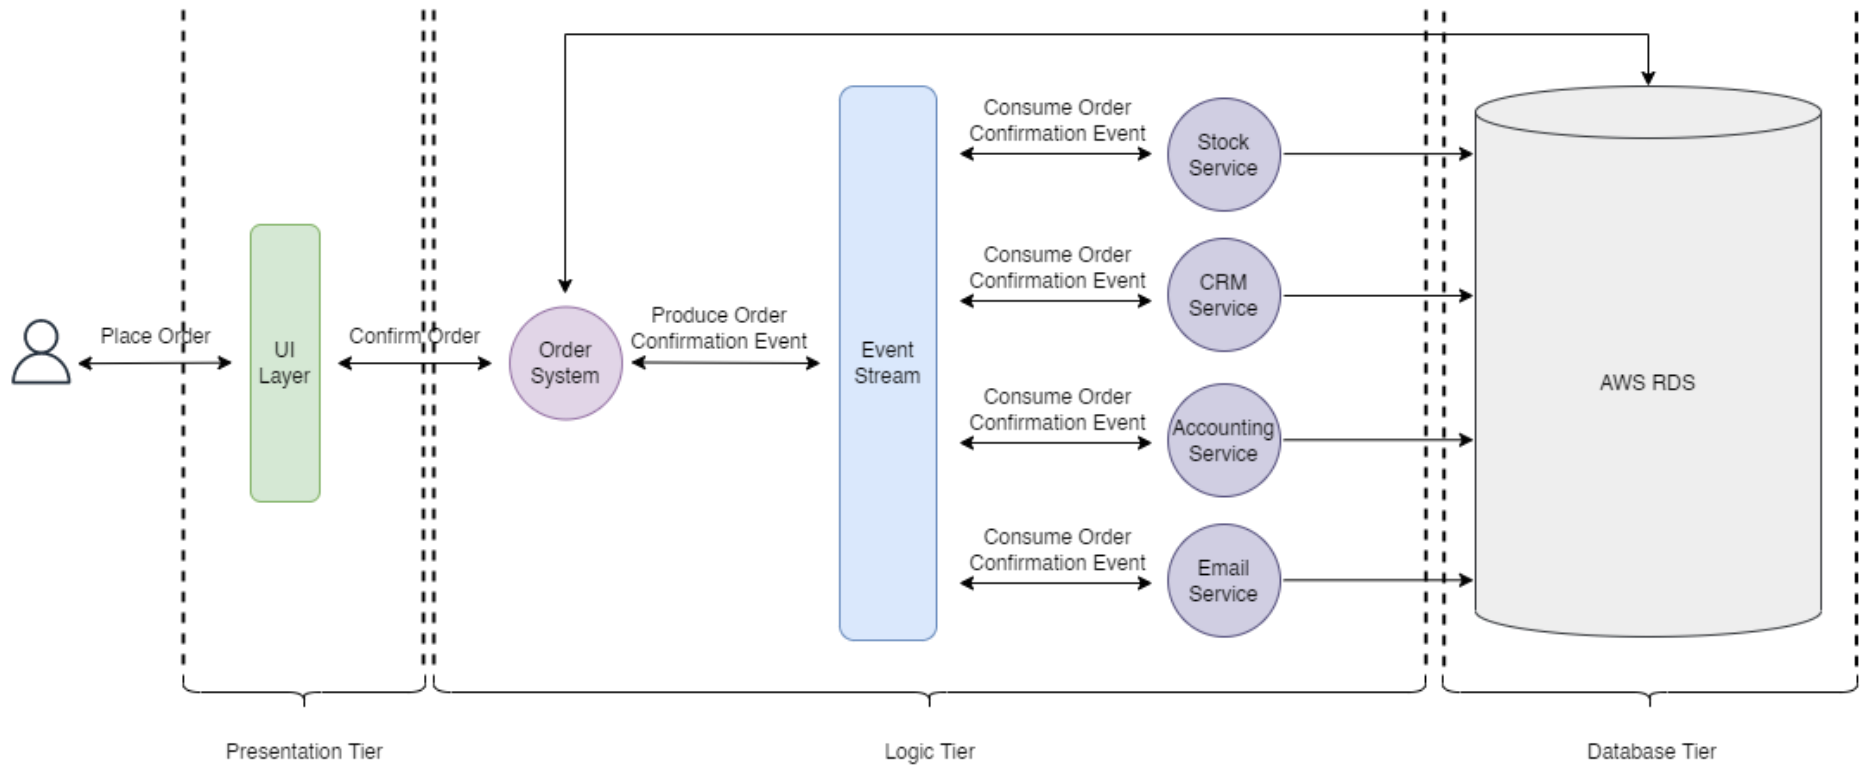

Figure 1: Event-Driven Microservice Architecture

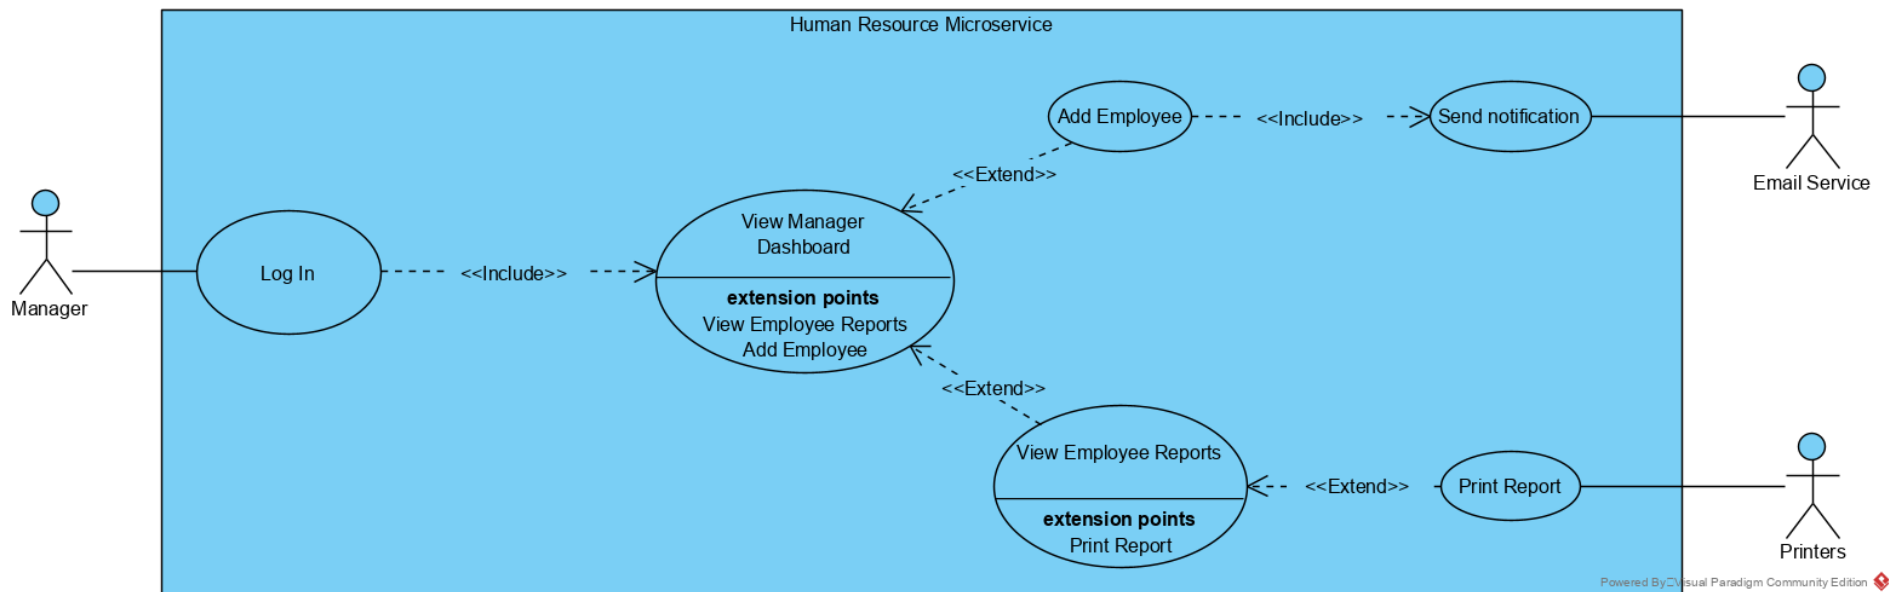

Figure 2: High level use case diagram

Table 1: User Login use case form

#	HR.UC001
Use Case Name	User Login
Description	The user logs into the system using their user credentials consisting of their unique email address (username) and a password.
Actors	User, Email Service
Precondition	User exists on the system as a manager
Main Flow of Events	<ol style="list-style-type: none">1. User enters their login credentials. [A1]2. User submits the information to the system.3. System validates the provided login details. [A2]4. System logs the user in and redirects to manager homepage [A3]
Alternative flow Of Events	<p>A1. User does not remember their login credentials.</p> <p>User can request to resend/reset their password via email using <i>Email Service</i> actor (E. "Forgot login details").</p> <p>Return to step 1.</p> <p>A2. Invalid details entered, user must correct the incorrect details or reset their password using A1.</p> <p>Return to step 1.</p> <p>A3. User does not have the role of a manager to access restricted content.</p> <p>End of use case.</p>
Postcondition	User logged into the system and can access manager restricted contents of WeeBits HR system.
Issues	

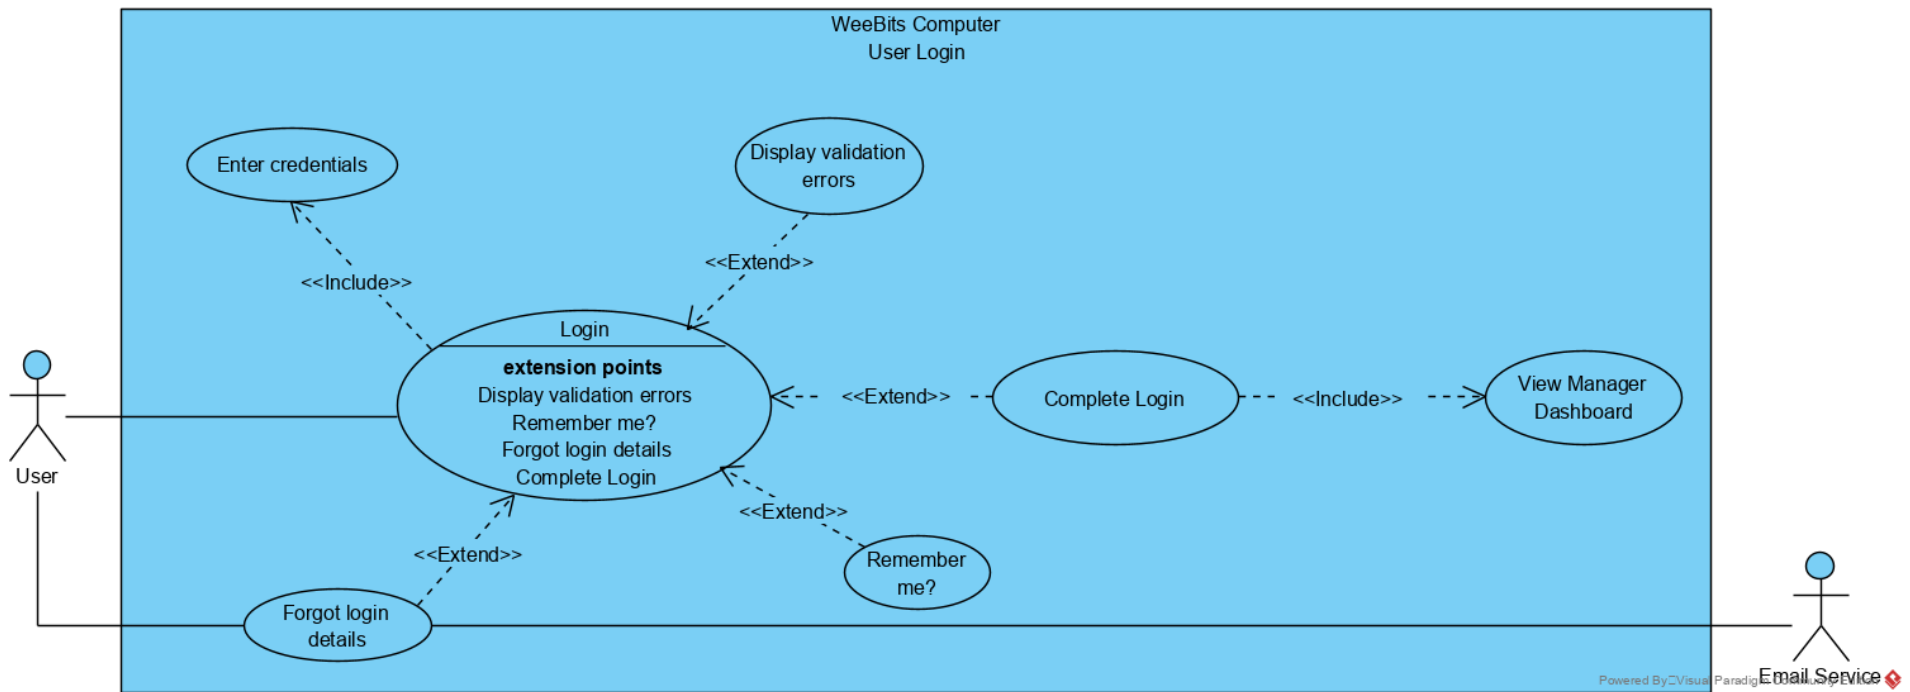

Figure 3: User Login use case diagram

Table 2: Add Employee use case form

#	HR.UC002
Use Case Name	Add Employee
Description	The logged in manager enters the employee details into the appropriate form and submits the form to add a new employee to the system.
Actors	Logged In Manager, Email Service
Precondition	The manager is logged into the system
Main Flow of Events	<ol style="list-style-type: none"> 1. Manager enters employee details. 2. Manager submits the information to the system. 3. System validates the provided information. [A1] 4. System adds a new employee record, sends welcome email via <i>Email Service</i> and displays a success message.
Alternative flow Of Events	<p>A1. Invalid details entered.</p> <p>The manager must correct the incorrect details.</p> <p>Return to step 1.</p>
Postcondition	A new employee is created with an appropriate associated role.
Issues	

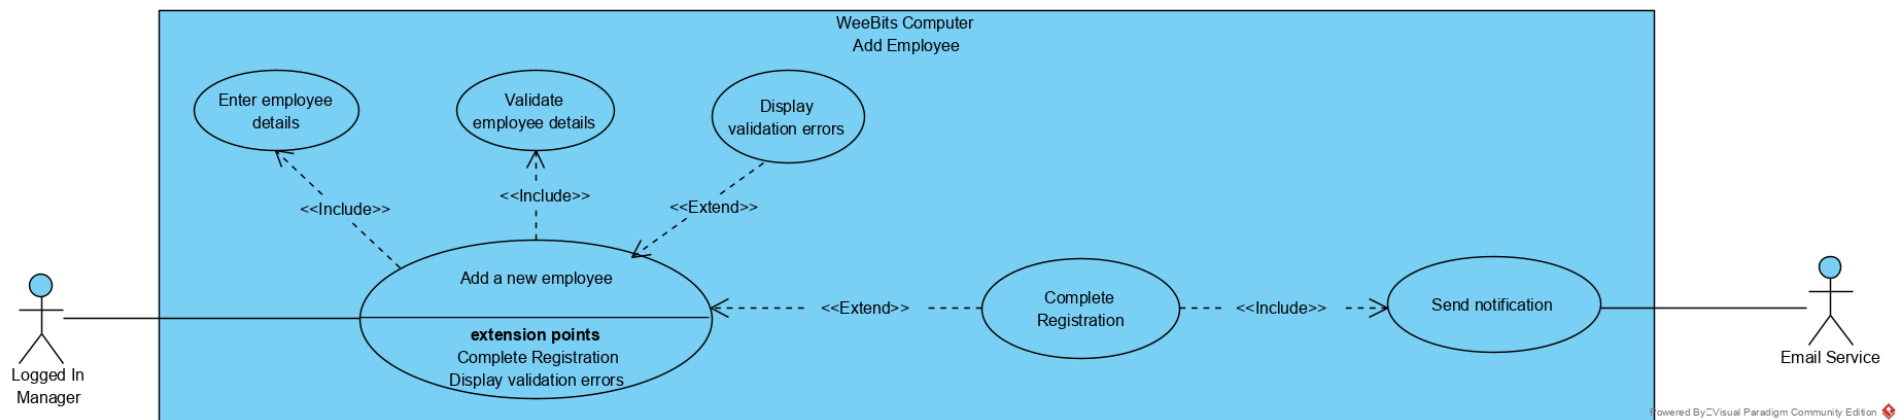

Figure 4: Add Employee use case diagram

Table 3: View Reports use case form

#	HR.UC003
Use Case Name	View Reports
Description	The manager selects a report type with optional filters and parameter to view the relevant report. The manager may choose to print a hard copy of the report on screen.
Actors	Logged In Manager, Printer
Precondition	The manager is logged into the system
Main Flow of Events	<ol style="list-style-type: none"> 1. Manager selects a report type. 2. Manager enters optional filters/report parameters and submits a new report generation request 3. System validates the provided information. [A1] 4. System displays the selected report [A2]
Alternative flow Of Events	<p>A1. Invalid filtering options/report parameters provided.</p> <p>The manager must correct the incorrect details.</p> <p>Return to step 1.</p> <p>A2. Manager may choose to send the report to printing facility (<i>Printer</i> actor) for printing (E "Print Report").</p> <p>End of use case.</p>
Postcondition	User logged into the system and can access manager restricted contents of WeeBits HR system.
Issues

Table 4: Human Resource System User Stories

Human Resource System User Stories					
#	Theme	Role (As a...)	Action (I want...)	Goal (So that I can...)	
HR.US001	Login System	Manager	to have a unique username	log into the system	✓
HR.US002		Manager	to have a password	log into the system	✓
HR.US003		Manager	to have a secure login screen with username and password fields	enter my unique login credential	✓
HR.US003		Manager	a button on the secure login screen	submit credentials and access restricted content	✓
HR.US004			to have the ability to log out of the system	end my session and prevent system misuse	✓
HR.US005		Manager	the human resource system to be role restricted	prevent unauthorised access	✓
HR.US005		Manager	to access human resource system after successful login	manage employee data and generate reports	✓
HR.US006	Employee Management	Manager	to have an add employee screen with input fields	enter information for a new employee	✓
HR.US007		Manager	a button on the add employee screen	submit the employee data and add as a new staff member	✓
HR.US008		Manager	to view a list of all current employees	get an overview of currently employed staff	✓

Human Resource System User Stories					
#	Theme	Role (As a...)	Action (I want...)	Goal (So that I can...)	
HR.US009		Manager	to print a list of all current employees	produce a hardcopy of the employee list	✓
HR.US010		Manager	to view a list of current employees for a region	access staff information related to a region	✓
HR.US011		Manager	to print a list of current employees for a region	produce a hardcopy of the region employee list	✓
HR.US012	Reports Management	Manager	to view number of employees filtered by age	generate employee demographics report	✓
HR.US013		Manager	to print number of employees filtered by age	produce a hardcopy of age group report	✓
HR.US014		Manager	to view number of employees filtered by gender	generate employee demographics report	✓
HR.US015		Manager	to print number of employees filtered by gender	produce a hardcopy of gender report	✓
HR.US016		Manager	to view average rates of pay by role	compare average payrates across the roles	✓
HR.US017		Manager	to print average rates of pay by role	produce a hardcopy of role payrates report	✓
HR.US018		Manager	to view average rates of pay by gender	compare average payrates across genders	✓
HR.US019		Manager	to print average rates of pay by gender	produce a hardcopy of gender payrates report	✓

Human Resource System User Stories					
#	Theme	Role (As a...)	Action (I want...)	Goal (So that I can...)	
HR.US020		Manager	to see absentee profile by job category	review absences across different job categories	<input checked="" type="checkbox"/>
HR.US021		Manager	to view annual staff turnover ratio for the whole company	monitor company-wide employee satisfaction	<input checked="" type="checkbox"/>
HR.US022		Manager	to print annual staff turnover ratio for the whole company	produce a hardcopy of the staff turnover report	<input checked="" type="checkbox"/>
HR.US023		Manager	to view annual staff turnover ratio by region	monitor employee satisfaction for a region	<input checked="" type="checkbox"/>
HR.US024		Manager	to print annual staff turnover ratio by region	produce a hardcopy of the staff turnover report	<input checked="" type="checkbox"/>

Employees

API endpoints for employee management

GET

/employees

Return all WeeBits employees

▼

GET

/employees/{employee_email}

Return details of an employee

▼

POST

/employees/create

Add a new employee

▼

Reports

API endpoints for report management

GET

/reports/current-employees

Return all current employees

▼

GET

/reports/employees-demographics

Return employees demographics report

▼

GET

/reports/average-payrate

Return employees payrate report

▼

GET

/reports/absentee-profile

Return employees absentee profile

▼

GET

/reports/annual-staff-turnover

Return annual staff turnover rate

▼

Figure 20: HR microservice API endpoints

GET

/employees/{employee_email} Return details of an employee

Return an employee with associated Branch, Job and Absences objects belong to the unique employee_email paramater provided.

Parameters

Try it out

Name	Description
employee_email * required string (path)	Employee's unique employee_email address e.g. bobby@weebits.co.uk. <div>employee_email</div>

Responses

Code	Description	Links
200	Success	No links
404	Not Found	No links

Media type
